

Hot Take Engine | Transforming Insights into AI-Visible Content

Why This Matters

The way people search has changed. Chat GPT usage and AI Overviews are reducing organic click-through rates by up to ~35%—meaning fewer users reach websites via traditional links. Our content is designed to be seen, cited, or summarized where those AI layers live. These systems don't create knowledge; they pull consensus from published content. If your expertise isn't represented, you won't be part of the answer.

Traditional marketing isn't built for this shift:

- Social media posts vanish in the scroll.
- Generic blogs rarely surface in AI or search.
- Your best insights stay trapped in conversations with clients instead of working for you online.

Don't let competitors capture the visibility you deserve.

The Hot Take Engine: Your System for AI Visibility

We've built a content program designed for this new landscape. The Hot Take Engine turns one 60-minute recorded conversation into a full pipeline of original, persona-driven content engineered to be AI-visible.

Here's how it works:

1. **Recorded Call:** Once a month, we lead a guided 60-minute conversation with your team.
2. **Content Extraction:** We pull insights, stories, market interpretations, and expertise from that conversation.
3. **Editorial Refinement:** Our expert editorial team transforms the transcript into blogs and social posts.
4. **Delivery:** You receive polished content, ready to review, approve, and publish.

What You Get

From each 60-minute session, you receive:

- **8 persona-driven blog articles** - SEO-optimized, edited, and structured to surface in both Google and AI results. Includes: sourced images, titles, descriptions, and tags for seamless publishing.
- **12+ social media snippets** - polished & formatted in a spreadsheet, ready to post on your channels.

Optional add-ons include video cuts, email newsletters, and custom graphics.

The Content We Target | Guided by Experts, Not Guesswork

The Hot Take Engine isn't just about turning on a recorder. Behind the scenes, our team of marketing experts researches your market, audience, and competitors to identify the most effective questions, categories, and angles. When we sit down for your 60-minute call, we're not winging it - we're probing for the insights, stories, and perspectives that will position you as the best answer when your audience turns to Google or AI. That preparation ensures the content we deliver is not only authentic, but also strategically designed to make you visible where it matters most.

- Target audience AI questions/conversations
- Buyer and seller psychology
- Market interpretation and forecasting
- Common myths and misconceptions
- Stories and lessons from the field
- Local market happenings
- Micro-expertise that builds authority and trust

Why It Works

- **Rooted in Real Conversations:** No keyword-guessing. Content comes straight from your team's lived expertise.
- **Structured for AI Visibility:** Articles are shaped the way AI assistants digest and cite answers.
- **Efficiency Without Sacrifice:** One hour of your time produces a month's worth of content.
- **Consistency Builds Trust:** Regular, persona-driven output keeps your brand top-of-mind and authoritative.
- **Proven Results:** Clients see measurable increases in visibility and engagement within 60 days.

Packages

- **Monthly Engine** - 1x 60-minute call → 8 blogs + 12+ social snippets | **Price: \$1,550/month**
- **Bi-Monthly Engine** - 2x 60-minute calls → 16 blogs + 24+ social snippets | **Price: \$2,250/month**
- **Add-Ons:** Video edits, newsletters, custom graphics

Your expertise deserves to be the first answer people see - in Google, in AI, and in your market. The Hot Take Engine makes that happen.
